To whom it may concern:-
re. Mrs Kate Joicey.

Kate Joicey taught at St. Anthony's R.C. Girls' School from September 1996 to August 1999 and was a member of my department throughout that period.

Kate was well qualified and taught Biology at Key Stage 3 (Years 7-9) and to GCSE and A level. In her later years in the department she had a considerable input into GCSE and A level courses.

She was a very able teacher who established a good rapport with all of her pupils/students and achieved a high success rate in examinations. She had a pleasant personality and worked well with other members of staff, both in the Science department and the wider school situation.

She also involved groups/teams of pupils in a variety of environmental projects and achieved considerable success in this area also.

I found Kate to be efficient, well organised and co-operative, with a pleasant nature. She was a valuable and much appreciated member of the department.

I am sure that she will achieve success in anything that she undertakes and I wish her well.

Yours sincerely,

Barry Stephenson
Head of Science
